

LIST OF FIGURES

- Fig.3.1 Flow chart for Genetic algorithm
- Fig.3.2 Flow chart for PSO algorithm
- Fig.3.3 Temperature/humidity sensor
- Fig.3.4 LDR
- Fig.3.5 Block diagram of remote control
- Fig.3.6 Block diagram of receiver section
- Fig.3.7 Circuit diagram for remote control
- Fig.3.8 Circuit diagram for power supply
- Fig.3.9 Circuit diagram for receiver section
- Fig.3.10 Proteus Simulation model for receiver section
- Fig.3.11 Proteus Simulation model for remote control
- Fig.3.12 Power supply model
- Fig.4.1 Comparison between relative humidity values by sensor and standard instrument
- Fig.4.2 Comparison between temperature values by sensor and standard instrument
- Fig.4.3 Snapshot for the testing of temperature sensor with standard thermometer
- Fig.4.4 Snapshot for the testing of humidity sensor with standard instrument
- Fig.4.5 LDR circuit
- Fig.4.6 Relation between load resistance (K ohm) of light intensity (Lux)
- Fig.4.7 Relation between resistance (K ohm) of LDR with % illuminance level
- Fig.4.8 Firing angle with rms value
- Fig.4.9 Variation of $V_{r.m.s}$ w.r.t firing angle
- Fig.4.10 Power consumption (W) w.r.t dimming levels for 100W bulb
- Fig.4.11 Power consumption (W) w.r.t dimming levels for 18W exhaust
- Fig.4.12 Power consumption (W) w.r.t dimming levels for 1000W heater
- Fig.5.1 Block diagram for PID controller
- Fig.5.2 MATLAB Simulink model for PID controller

Fig.5.3 Block diagram for GA-PID controller

Fig.5.4 Block diagram for PSO-PID controller

Fig.5.5 Process for Software Developments

Fig.5.6 AVR Studio programming window

Fig.5.7 Robokits AVR USB Programmer window

Fig.5.8 Flow chart for remote section in semi-autonomous mode

Fig.5.9 Flow chart for remote section in autonomous mode

Fig.5.10 Flow chart for remote section in autonomous mode (contd..)

Fig.5.11 Flow chart for interrupt for receiver section

Fig.5.12 Flow chart for receiver section

Fig.6.1 Step response of heater with PID control

Fig.6.2 Step response of heater with GA-PID

Fig.6.3 Step response of heater with PSO-PID

Fig.6.4 Power consumption for heater in (KW) for PID, GA-PID and PSO-PID during experiment

Fig.6.5 Power saving (%) w.r.t conventional heater

Fig.6.6 Step response of bulb with PID control

Fig.6.7 Step response of bulb with GA-PID

Fig.6.8 Step response of bulb with PSO-PID

Fig.6.9 Power consumption for bulb in (W) for PID, GA-PID and PSO-PID during experiment

Fig.6.10 Power saving (%) w.r.t conventional Bulb

Fig.6.11 Step response of exhaust fan with PID control

Fig.6.12 Step response of exhaust fan with GA-PID

Fig.6.13 Step response of exhaust fan with PSO-PID

Fig.6.14 Power consumption for exhaust fan in (W) for PID, GA-PID and PSO-PID during experiment

Fig.6.15 Power saving (%) w.r.t conventional exhaust fan

Fig.7.1 (a) Snapshot for developed system

Fig.7.2 (b) Snapshots for developed receiver and remote control

Fig.7.2 (c) Snapshots for developed receiver and remote control

Fig.7.2 (d) Snapshots for developed receiver and remote control
