Declaration Certificate	i
Thesis Completion Certificate	ii
Thesis Completion Certificate	iii
Acknowledgement	iv
Contents	vi
Executive Summary	xi
List of Symbols	xiv
List of Abbreviations	xv
List of Figures	xviii
List of Tables	xx

Chapter 1

Introduction

1.1 Background	2
1.2 Problem Statement	7
1.3 Research Objectives	8
1.4 Research Methodology	8
1.5 Thesis Layout	11

Chapter 2

Literature Review

2.1 Crumb Rubber Modified Bitumen (CRMB)	15
2.2 Wet Process	15
2.2.1 History of Wet Process	18
2.3 Interaction of Bitumen with Crumb rubber	19
2.3.1 Overview of the Bitumen Crumb Rubber Interaction.....	19

2.3.2 Effect of Temperature	20
2.3.3 effect of particle size.....	21
2.4 Improvement for Storage Stability of CRMB.....	22

Chapter 3

Materials and Methods

3.1 Materials	30
3.1.1 Bitumen.....	30
3.1.1.1 Production of Bitumen	32
3.1.2 Crumb Rubber.....	33
3.1.2.1 Process for Crumb Rubber Production	34
3.2 Test Mmethods	35
3.2.1 Physical Test Methods.....	36
3.2.1.1 Penetration	36
3.2.1.2 Softening Point	37
3.2.1.3 Elastic Recovery	38
3.2.1.4 Viscosity	38
3.2.1.5 Rolling Thin Film Oven Test (RTFO)	39
3.2.1.6 Pressure Aging Vessel (PAV)	39
3.2.1.7 Storage Stability Test	39
3.2.2 Rheological Tests.....	40
3.2.2.1 Dynamic Shear Rheometer (DSR) Test	40
3.2.2.2 Bending Beam Rheometer (BBR) Test	41
3.2.2.3 Multiple Stress Creep Recovery (MSCR) Test	42
3.3.3 Performance Test	43
3.3.3.1 Marshall Stability Test	43
3.3.3.2 Rutting Resistance Test	44

Chapter 4

Improved Storage Stability of Crumb Rubber Modified Bitumen using Long Chain Amines

4.1 Introduction	48
4.2 Research Methodology	50
4.2.1 Materials	50
4.2.2 Methods.....	51
4.2.2.1 Bitumen Modification.....	51
4.2.2.2 Physical Test Methods	52
4.3 Results and Discussion	52
4.3.1 Conventional Tests.....	52
4.3.1.1 Storage Stability Test	54
4.3.2 Rheological Properties.....	55
4.3.2.1 Dynamic Shear Rheometer (DSR) Test.....	55
4.3.2.2 Bending Beam Rheometer (BBR) Test	57
4.3.2.3 Multiple Stress Creep Recovery (MSCR) Test	58
4.4 Conclusion	60

Chapter 5

Synergic Effect of DETA (Diethylenetriamine) and Stearic Acid on Improved Storage Stability of Crumb Rubber Modified Bitumen

5.1 Introduction	62
5.2 Research Methodology	64
5.2.1 Materials	64
5.2.2 Bitumen Modification Procedure.....	64
5.3. Results and Discussion	65
5.3.1 Physical Properties.....	65
5.3.1.1 Storage Stability Test	65
5.3.2 Rheological Properties.....	68

5.3.2.1 Dynamic Shear Rheometer (DSR) Test.....	68
5.3.2.2 Bending Beam Rheometer (BBR)	70
5.3.2.3 Multiple Stress Creep Recovery (MSCR) Test	72
5.3.3 Performance Properties.....	74
5.3.3.1 Marshall Stability Test	74
5.3.3.2 Rutting Resistance Test	75
5.4 Conclusion	76

Chapter 6

Improvement of Storage Stability and Rheological Properties of Crumb Rubber Modified Bitumen using Waste PET Derivative with Dioic Acid

6.1 Introduction	79
6.2 Research Methodology	82
6.2.1 Materials	82
6.2.2 Methods.....	82
6.2.2.1 Preparation of PET Derivative by Aminolysis	82
6.2.2.2 Preparation of CRMB Blends	83
6.3 Results and Discussion	84
6.3.1 Physical Properties.....	84
6.3.1.1 Storage Stability Test	87
6.3.2 Rheological Properties.....	88
6.3.2.1 Dynamic Shear Rheometer (DSR).....	88
6.3.2.2 Bending Beam Rheometer (BBR)	90
6.3.2.3 Multiple Stress Creep Recovery (MSCR)	91
6.3.3 Performance Properties.....	93
6.3.3.1 Marshall Stability Test.....	93
6.3.3.2 Rutting Resistance Test	94
6.4 Conclusion	95

Chapter 7

Conclusion and Future Research

7.1 Conclusion	97
7.2 Future Research	98
References.....	99
