

LIST OF TABLES

Table 2-1 List of Gaussian width parameter with corresponding frequency and approximate pulse width.....	30
Table 3-1 Ground motion response nominal parameters.....	48
Table 4-1 Estimated values of crustal thickness H, V_p/V_s ratio and the corresponding Poisson's ratio (σ) obtained for each station.....	72
Table 5-1 Details of numbers of elastic parameters for different symmetry geometries.....	102
Table 5-2 List of teleseismic earthquakes used for Ps splitting analysis with their corresponding splitting parameters (Φ , δt) at each station.....	112
Table 5-3 List of average splitting parameters (Φ , δt) at each station.....	124
Table 5-4 List of average values of seismic wave (P-and S- wave) velocities measured in both along and across the foliation with their corresponding P- and S-wave anisotropy coefficients.....	134
